Cherry Grove Dredging Project

North Myrtle Beach, SC – March 23, 2017 – The Cherry Grove Dredging Project continues to unfold. The channels remaining to be dredged are “Y”, “V”, “W”, and “X”.

Scroll down for a map showing the location of Channels in relation to streets. Also, scroll down for a dredging status map provided to the city.

We have been asked when the dredging will conclude. As always, due to factors such as poor weather, unforeseen mechanical breakdowns, pipeline moves, and the need to remove large debris (example: a rooftop) embedded in some channels, we cannot be specific about an end date but can generally say that the project will end toward the end of April, if not earlier.

If you have individual questions about the dredging project, please email Pat Dowling at pcdowling@nmb.us.
